Enterprise Architecture

Business Continuity/Disaster Recovery Strategy KickStart

BENEFITS

- Maximize business outcomes with guidance on how to avoid pitfalls in disaster recovery strategies

- Decrease time to value by understanding how to use Nutanix validated technologies to protect your business

- Understand how to help mitigate common threats businesses face today such as ransomware

AUDIENCE

- IT leaders and database architects seeking a foundational understanding of how to plan and execute a successful BC/DR plan

OVERVIEW

The Business Continuity/Disaster Recovery (BC/DR) Strategy KickStart gives your team the insights and practical guidance needed to help organizations, understand, and address common obstacles in developing a robust BC/DR strategy.

Transformation Kickstart	→	Transformation Workshop	→	Design Workshop	→	Migration Workshop	→	Deployment & Migration Services

Upon completion of this workshop, your team will:

- Know the areas organizations struggle with when setting up a successful BC/DR strategy
- Understand the reasons why DR plans fail
- Mitigation strategies for ransomware, one of the leading risks in IT today
- Understand the importance of application dependencies when creating a DR plan

SERVICE SCOPE

Delivered by an experienced specialist, this KickStart workshop showcases leading-edge thought leadership by providing relevant, actionable insights on the critical areas of BC and DR. Based on the information learned in Discovery, we'll then deliver a workshop customized to address your specific needs.

In addition to a high-level overview of BC/DR infrastructure architecture, the workshop introduces the decisions critical in creating successful strategies that reduce the risk of downtime and ensure efficient operations during times of crisis.

Potential topics:

Our specialists possess a broad range of expertise and can engage in depth with you on any number of relevant topics, such as:

- Review and discuss the areas of BC/DR where organizations struggle most
- Define requirements and identify options to resolve issues

NUTANIX

PREREQUISITES

- Knowledge of IT infrastructure and virtualization are essential to a meaningful experience
- Completion of a Discovery Questionnaire
- Discovery session prior to tailored workshop

DELIVERABLES

- Workshop slides and supporting enablement content
- Optimized customer strategy
  - o Summary of relevant key concepts
  - o Next steps to advance strategy
- NVD document

- Ensure your BC/DR plans meet your objectives
- Understand why ransomware is becoming one of the largest threats to your business and discuss how you can mitigate those risks
- Identify and discuss the attributes of a robust BC/DR strategy and the consequences of failing to follow through on its implementation
- Review replication options for both Nutanix AHV hypervisor (AHV) and VMware ESXi hypervisor (ESXi) that drive different recovery point objective (RPO) and recovery time objective (RTO) outcomes
- Understand the technical similarities and differences between AHV and ESXi when running either on Nutanix
- Discuss how the Nutanix Validated Design (NVD) ensures that RPO and RTO requirements are met and helps to reduce time required to create a successful BC/DR strategy

TASK

	Duration
BC/DR Strategy KickStart Workshop	typically 2 hours delivered remotely
