Infrastructure Modernization
Virtual-to-virtual Conversion

BENEFITS

- Accelerate your adoption of the Nutanix platform by leveraging experienced consultants

- Lower migration risks with a comprehensive plan tailored to your specific requirements

- Take advantage of comprehensive project documentation and a robust knowledge transfer session

PREREQUISITES

- Required licensing available to complete migrations

- Supported operating systems as per the Nutanix compatibility and interoperability matrix

- Existing Migration Plan already in place

- Supported destination hypervisors (AHV, ESXi or Hyper-V) as per the Nutanix compatibility and interoperability matrix

- Operating systems must be supported by the selected migration tool

OVERVIEW

Virtual-to-virtual Conversion is a collaborative engagement with the customer to execute a migration plan for your existing virtual machine (VM) workloads running on VMware ESXi, Hyper-V or AHV. The conversion streamlines and accelerates solution deployment and adoption while enabling business outcomes.

HCI Design Workshop → Workload Migration Workshop → HCI Cluster Deployment → **Conversion Services**

A certified Nutanix consultant reviews and executes a migration plan to ensure that migration requirements are identified and met the first time. The consultant ensures adherence to Nutanix- and industry-recommended best practices while minimizing cost and complexity.

SERVICE SCOPE

Execute an existing plan for migrating existing VMs from your current vSphere, Hyper-V or AHV infrastructure to a defined Nutanix-based infrastructure.

NOTE: Unsupported operating systems are out of scope for this service. If you need an operating system that isn't support, a custom statement of work is required.

This fixed-outcome service is sold in defined 'packs' of 5 VMs of up to 2.5TB per pack. For each 5-pack purchased, we'll migrate up to 5 VMs in a single contiguous migration wave. Multiple packs must be purchased to accommodate larger quantities of workloads and associated data migrations.

Migration Service:
- Review and verify migration requirements, constraints, assumptions, dependencies and decisions for the migration effort, as documented in the existing plan
- Deploy Nutanix Move or VMware Converter, as required for the migration plan
- Configure infrastructure, as required for the migration plan
- Execute the migration plan, process and single migration wave
- Execute the existing post-migration validation plan

NUTANIX.

DELIVERABLES

- Project schedule
- Project status reports
- Migration of existing VMs
- Migration Test Plan
- Project close out

TASK

MILESTONE	DURATION
Virtual-to-virtual conversion (V2V 5-pack)	Typically 2 days

TERMS AND CONDITIONS

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at https://www.nutanix.com/support-services/consulting-services/terms-and-conditions
