# AI/ML Design Workshop

Product Code: CNS-INF-A-WRK-DES-GPT

#### At-a-Glance

Phase: Design

The Nutanix Artificial Intelligence/Machine Learning (AI/ML) Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive infrastructure design for AI/ML workloads based on a Generative Pre-trained Transformer (GPT) model for inference workloads running on-premises Nutanix Cloud Infrastructure (NCI) clusters. It covers various aspects such as performance, scalability, flexibility, integration, and operational needs. This workshop is beneficial during the Design stage of the Nutanix GPT-in-a-box Solution journey.

## Service Scope

A series of design workshops is delivered by a highly skilled consultant with strong domain expertise and rich experience to ensure that the solution requirements and required outcomes are identified. The consultant works collaboratively with key customer stakeholders from architecture, virtualization, and networking teams during the design workshop to gather requirements and develop the design. After the Design workshop, the consultant develops an infrastructure Design document for the Al/ML inference platform, a configuration workbook that addresses conceptual, logical, and physical NCI design elements.

This service includes the following activities:

- Gather and document solution requirements, constraints, assumptions, dependencies, and decisions in a series of workshops
- Develop NCI cluster design for AI workloads
- Discuss the GPU selection and configuration options for inference
- Assess the network requirements and design virtual networking, including integration with the physical network
- Validate cluster size and platform selection based on workload details provided by the customer
- Design NUS Files or Objects data service
- Design security including data-at-rest encryption, Secure Sockets Layer (SSL) certificate, password complexity, and syslog

## Limitations

- The infrastructure design is limited to a single AI/ML inference use case. Management and other clusters design requires a separate NCI Design Workshop for each additional cluster
- The design includes a single NUS Files or a single Objects data service
- The design service is limited to a single physical site

## Prerequisites

None

#### **Required Product Licenses**

None

#### Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop

- Configuration Workbook
- Design Document
- Project Closeout

### Duration

Typically up to 5 days

#### Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Unified Storage (NUS)
- Nutanix Cloud Manager (NCM)

#### Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <a href="https://www.nutanix.com/support-services/consulting-services/terms-and-conditions">https://www.nutanix.com/support-services/consulting-services/terms-and-conditions</a>
