

Database Recommended Practices

Product Code: CNS-DBM-A-WRK-DRP

At-a-Glance

Stage: Plan

Database Recommended Practices offers database teams in-depth insights into Nutanix recommended databases hosted on the Nutanix Cloud Platform (NCP). This offer is ideal for the Plan stage of a Hybrid Multicloud journey and is suitable for new and existing database workloads.

Service Scope

Delivered by highly skilled consultants with solid database domain expertise and rich experience, the workshop provides recommendations for designing, optimizing, and scaling database workloads on NCP. Database workshops require collaboration with key customer stakeholders from architecture, databases, and applications.

The service includes the following activities:

- Conduct a database recommended practices workshop
- Review current pain points and any previously created database vendor support tickets
- Discuss design and configuration considerations when architecting database solutions on NCP
- Provide an overview of Nutanix recommended practices for running database workloads in areas such as NCP Cluster configuration, database server virtual machines (VMs), and network and database configuration
- Discuss virtualization optimizations for the supported hypervisor in use
