

Hosted Private Cloud powered by Nutanix

Scalable platform integrates proven OVHcloud hardware and Nutanix software for complete deployments in a few hours

The pace of modern business requires fast and frictionless infrastructure consumption. IT teams need to spend more time delivering direct value to the business and less time procuring, deploying, and managing IT resources.

Nutanix and OVHcloud have joined forces to deliver the high-powered infrastructure you need—where and when you need it. OVHcloud's [Hosted Private Cloud powered by Nutanix](#) solution is a pre-installed and ready-to-use Nutanix hyperconverged infrastructure (HCI) environment, operating on 100% dedicated and secure infrastructure running in OVHcloud datacenters, enabling you to procure and deploy a dedicated Nutanix cluster and start running workloads within a few hours.

KEY BENEFITS

Easy adoption

Deploy complete, ready-to-use Nutanix clusters in hours, with no long-term commitment

Data sovereignty

Take advantage of highly resilient and secure private infrastructure to address European and Canadian sovereignty requirements

High performance

Choose from the latest high-grade bare metal servers to deliver maximum performance from Nutanix HCI

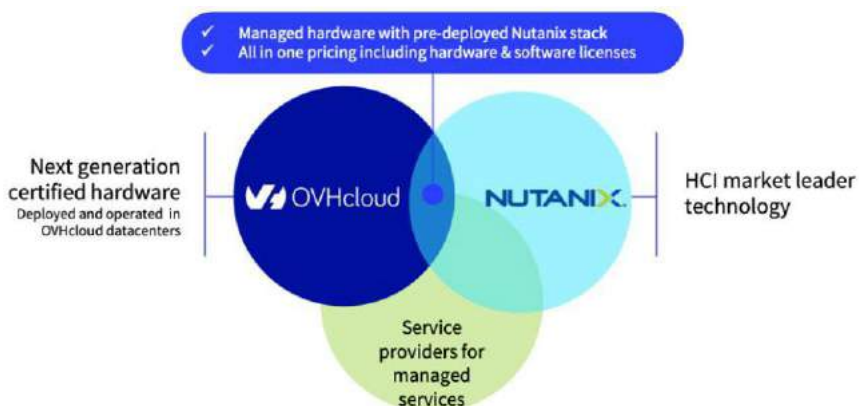

No hidden costs

Ingress, egress, and all software and hardware licenses are included in the price with no surprises

A FAST AND SIMPLE INFRASTRUCTURE SOLUTION

[Hosted Private Cloud powered by Nutanix](#) is an all-in-one, scalable platform that gives your team quick access to a dedicated, fully installed and functional Nutanix cluster. Next-generation managed hardware is pre-deployed with the Nutanix HCI software stack, and all hardware and software licenses are included:

- **No licensing hassles.** All hardware and software licenses are purchased and owned by OVHcloud, eliminating complexity and hidden costs
- **Monitored hosts.** Physical hosts reside in OVHcloud datacenters and monitored 24/7 by the OVHcloud team.
- **Fast to deploy and scale.** Your Nutanix cluster is deployed and available in a few hours.

OVHcloud CONNECT

OVHcloud Connect provides a secure, high-performance link between your company network and OVHcloud datacenters, with everything configurable via the OVHcloud Control Panel. The latest security policies ensure your data and applications remain available and secure.

An extended network enables you to connect to OVHcloud via global points of presence or via OVHcloud partners.

NUTANIX CLOUD PLATFORM

Nutanix Cloud Platform utilizes a modern, software-defined architecture that natively integrates all IT resources to run any application while delivering true consumer-grade simplicity, drastically reducing operational complexity. The Nutanix software stack is optimized and scalable to support the workloads your business depends on. Because Nutanix Cloud Platform runs in OVHcloud as well as on-premises and in public clouds, you can create a hybrid multicloud environment that is completely unified, enabling you to run applications anywhere without refactoring and with the same operational model and tools.

OVHcloud

OVHcloud is a global cloud provider that specializes in delivering industry-leading performance and cost-effective solutions to better manage, secure, and scale data. The service provider manages 32 data centers across 12 sites on four continents with its own fiber-optic global network for maximum efficiency.

OVHcloud's bare-metal technology underlies [Hosted Private Cloud powered by Nutanix](#), enabling you to deploy high-resilience infrastructure quickly or customize a solution to your project needs. It only takes a few clicks to start enjoying the benefits of strong performance, unlimited network traffic, and guaranteed service levels.

SECURE BY DESIGN

OVHcloud vRack provides private networking for your critical workloads with extended network tunneling via OVHcloud Connect to link to your datacenters and other locations. The solution also takes advantage of advanced Nutanix security with capabilities that include a hardened software platform, data-at-rest encryption, and microsegmentation.
